

ULTRA ADDITIVES, INCORPORATED  
CLOVER, SOUTH CAROLINA

**The Ultra Additives, Inc. facility, of Clover, South Carolina,** manufactures performance additives, such as chemical anti-foams and de-foamers. Ultra Additives is a small business, thus they are required to list only one past accomplishment and two future commitments. Additionally, the facility is ISO14001 certified.

#### ENVIRONMENTAL PERFORMANCE

##### *Past Accomplishments*

Ultra Additives, Inc. has demonstrated its commitment to environmental performance through reduced packaging materials use. Since 1999, the facility has:

- **Reduced packaging materials** by 100% thus eliminating 214,000 lbs of excess packaging, by opting to use recyclable drums for packaging.

##### *Future Commitments*

Ultra Additives is working to reduce total solid waste and also its potential for releases. By 2004, the facility will:

- **Reduce total solid waste** 25% by reducing packaging materials and using recycled materials instead.
- **Reduce potential for releases** 100%, thus saving 42,000 gallons of mineral products, acetic acid products, water, polyglycol & surfactant products by using a storage tank spill containment system.

#### COMMUNITY OUTREACH

The Ultra Additives facility maintains contact with the local community through membership in community meetings, as well as responding to public concerns and staying informed of local news. The facility notifies the public of important matters through press releases and through the municipal permit application process. The Annual Performance Report will be made available through the facility's website at [www.ultraadditives.com](http://www.ultraadditives.com)
